ABOUT US

Near one million People die each day in Sub-Saharan Africa. The healthcare system is inadequate, and access to qualified Medical professionals in rural communities is almost non-existent.

At Dynamic Doctors, we believe that with proper training and the deployment of health workers – including medical doctors and field specialists – we can significantly improve access to quality healthcare, even in the most remote areas.

Dynamic Doctors Uganda is committed to ensuring that everyone has access to basic healthcare and fully qualified medical practitioners. Through our efforts, we aim to achieve this goal while establishing an efficient referral network and streamlined pathways for patients requiring specialized hospital care or treatment.

It's always very hard finding a qualified medical Doctor with adequate knowledge about our conditions in the village. Thanks To Dynamic Doctors visiting Kibooba village and referring us appropriate hospitals when necessary where we can access relevant services.

Story from Namuyiki Olivia

CEO MESSAGE

Dr. Oscar Muhoozi

As we reflect on 2024, we celebrate a year of tremendous progress and impact at DDU, fueled by the unwavering support of our donors, partners, and communities. Together, we have taken significant strides towards realizing our long-term vision of Dynamic Doctors Africa—a future where accessible, effective, and equitable healthcare transforms lives across the continent with reproductive health rights and services at the center.

This year, we expanded our Community Lifeline Initiative, improved maternal and child healthcare outcomes, and strengthened referral linkages. Key collaborations with organizations such as the Ministry of Health and international advisors, donors, and partners have amplified our impact, allowing us to reach and empower more marginalized populations than ever before.

I extend our heartfelt gratitude to our Executive Committee, Board of Directors, staff, volunteers, and the communities we serve. Your dedication, resilience, and shared vision have been instrumental in these achievements. To our beneficiaries, your trust and courage inspire us to do more.

As we celebrate these milestones, we remain committed to transforming healthcare across Africa. Together, we can create a healthier, more equitable future.

Thank you for being part of this journey.

Team Lead, Dynamic Doctors

MESSAGES FROM THE BOARD

In 2024, Dynamic Doctors advanced its mission to destigmatize reproductive healthcare. The organization's programming, designed for medical students and doctors in training, focused on familiarizing participants with reproductive health services and demonstrating their positive impact on communities. Graduates of these programs returned to their home communities and countries equipped to advocate for comprehensive reproductive rights and deliver these essential services to their patients.

Bridget Bahannon

US Director

2024 has been a transformative year for Dynamic Doctors in Uganda. Through our commitment to training clinical students in maternal and child healthcare, we have empowered a new generation of healthcare providers to support women with compassion and expertise. Our advocacy for women's rights and pro-choice policies has amplified the voices of those who have been marginalized for far too long, driving progress toward gender equality and improved SRH services.

The Community Lifeline Initiative has once again proven to be a beacon of hope, delivering vital healthcare services to some of the world's poorest and most underserved populations, who would otherwise face insurmountable barriers to access basic medical care. Furthermore, our extensive research efforts have laid the groundwork for evidence-based solutions that will drive meaningful and lasting change, not just in Uganda but across Sub-Saharan Africa.

Dynamic Doctors remains steadfast in our mission to bridge healthcare gaps, champion women's rights, and deliver life-saving services to the most vulnerable. Together, with our wonderful staff/volunteers and the unwavering support of our partners, friends and families, we are building healthier, more equitable communities.

Gary Melton

UK Director

MESSAGES FROM THE BOARD

We have achieved significant milestones in financial stewardship and organizational efficiency. Through transparent management and resource optimization, we ensured the sustainability of our programs while expanding our impact. I extend my gratitude to our team and partners for their unwavering support and commitment to our mission.

Ms. Getrude Nandudu

FINANCE AND ADMINISTRATIVE DIRECTOR

Dr. Susan Nuwahereza

Monitoring and Evaluation Director

2024 has been a year of remarkable growth and impact at Dynamic Doctors Uganda. We have ensured the effectiveness of our programs, measured meaningful outcomes, and identified areas for improvement. Together, we have reached thousands of lives, strengthened healthcare systems, and laid a solid foundation for sustainable change. I am proud of our collective achievements and remain committed to driving solutions that transform lives.

2024 has been a transformative year for Dynamic Doctors Uganda as we scaled up clinical services to meet the growing needs of our communities. Through dedication and collaboration, our team has delivered quality care, strengthened referral systems, and improved health outcomes for vulnerable populations. I am grateful for the unwavering commitment of our healthcare professionals and partners in advancing our mission.

Dr. Ronic Kamugisha

Clinical Programs Director

HOW WE WORK

Our high-impact approach leverages evidence-based knowledge and skills, delivering them directly to healthcare providers who require these resources to deliver quality care, save lives, and instill hope within vulnerable communities. Our objective is to enhance access to services offered by qualified and well-trained medical doctors and specialists in these communities. Our work in 2024 falls under four thematic areas;

1. Medical Training

Reproductive Health Externship Program. This initiative welcomes clinical year medical students, offering them hands-on training in maternal and child health. Aspiring healers from across Africa gather to hone their skills at regional Referral Hospitals, empowering them to serve patients with newfound expertise in their home countries.

“

“...the Reproductive Health Externship program with Dynamic Doctors offered me a chance to gain the clinical skills that I felt I was lacking yet I needed them to cater for the reproductive health needs of my patients...”

Dr. Hadiza Thompson ([Watch Full Video Via LinkedIn](#))

2. Health Service Provision

Our Community Health Lifeline Initiative (CLI) continues to serve as a beacon of hope for underserved communities. Despite facing funding constraints, the program has successfully reached more than 1,700 beneficiaries in the Kyampisi and Nama sub-counties of Mukono District. This initiative focuses on delivering essential healthcare services, with a particular emphasis on maternal and child health, as well as mental health.

“

After being referred to Jinja Regional Referral Hospital for advanced care, I was initially scared due to financial constraints and concerns about long queues and inadequate care. However, the outreach team followed up with me, connected me with a doctor who guided me through the process, and ensured I received proper care. I was diagnosed with stage 2 breast cancer and am now receiving treatment, thanks to their support and dedication.

Namuwonge Hasifar, 37year, Mother of 3 children

3. Health Advocacy

Dynamic Doctors Uganda continues to champion Sexual and Reproductive Health Advocacy to reduce maternal mortality and morbidity rates. Through our pro-choice ideology, we are actively promoting safe abortion care, comprehensive family planning, and legislative changes to improve SRH services.

Our advocacy efforts aim to dismantle stigma and drive systemic change. We envision an Africa where every woman has access to safe and equitable healthcare services.

Over 430 medical doctors, countless medical students, and health workers across various cadres actively participate in our advocacy training programs, equipping them with the knowledge and skills to champion better health outcomes for their communities.

4. Research

In collaboration with other organizations and health institutions, we are actively engaged in impactful research aimed at improving the health of our communities. This research leverages data collected from our programs and initiatives to inform evidence-based solutions and drive meaningful change.

“

In our Community Lifeline Initiative, patients frequently expressed the need for an advanced treatment facility. Many of them, after seeking advanced care in government facilities, often face challenges such as the absence of doctors or essential medicines, leading to frustration and doubt in the healthcare system.

To rebuild community trust in government hospitals, we introduced a solution: allowing our doctors to provide pro bono services within these facilities, ensuring high-quality care for patients referred from our outreaches. This approach bridges gaps in care and strengthens the referral system.

We also made a promise to our communities: if we receive humanitarian aid or government grants, we will establish a Dynamic Doctors center to ensure that patients continue to access specialized and reliable healthcare.

Dr. Salaam Francis
Medical Director

EXPANSION INTO BURUNDI

In 2024, we conducted a ground survey in Burundi and identified a critical need for improved healthcare. Recognizing this opportunity, we are adopting the Dynamic Doctors approach to address these challenges and are thrilled to announce the launch of our activities in Burundi this year, 2025. We are excited to expand our impact and bring transformative healthcare solutions to the region.

Dr. Mukiibi Ivan

“We believe our healthcare module can be successfully adopted in other countries. It has proven effective in addressing critical gaps caused by low doctor-to-patient ratios, particularly in rural communities in developing countries. Through our movement of dynamic and empowered doctors, we have witnessed transformative outcomes in public health and access to care.

As part of this mission, Dr. Mukiibi Ivan, a Co-founder and current Program’s Director, has emphasized the importance of expanding our work into Burundi. This step reflects our commitment to creating sustainable healthcare solutions that empower communities and ensure equitable access to quality medical care.”
